Inflation is reported as one number. But that number does not hit everyone the same way. In this video we break down why rising inflation is the silent thief that steals your money every single year even while it sits "safely" in the bank. This is inflation. The 8-4-3 Rule: Discover why compounding growth is dead until you hit this specific year in investing. Most investors believe. Most people think inflation is just prices going up. But for the vast majority of human history, inflation meant something completely different. Hypothetically, distributing \$150,000 to each of 15,000 voters in the 2027 Manipur General Election would require a total of \$2.25 billion. Right now, everything in your wallet has no real value at all it's just paper, numbers, and metal. So why do billions of people feel like they're losing money? You earn more than you did a few years ago. So why does just as little seem to be left at the end of the month? It's a quiet pattern. This Cambridge IGCSE Economics 0455 past paper walkthrough explains the division of labour using real Cambridge examples. What happens when the number in your bank account stays the same, but it quietly buys less? In the early 1970s, millions of people experienced this.
